

## Seedlist RH 2019

Die Portion Samen kostet CHF -.80

In der Regel enthält jede Portion 20-25 Korn Samen. Je nach Seltenheit oder schlechtem Fruchtansatz (z.B. Sulcorebutia) gibt es Abweichungen beim Preis oder der Kornmenge. Siehe dazu Hinweis in separater Spalte.

Hinweis: Viele Pflanzen habe ich unter dem Gruppennamen geführt (z.B. Ayl. fiebrigii). Das bedeutet nun nicht, dass alle Pflanzen gleich aussehen. So gibt es braun-, gelb-, weiss-, kurz- oder langbedornete Formen und auch die Blütenfärbung und -grösse weist zwischen den verschiedenen Lokalitäten teilweise erheblich ab. Ich habe deshalb, wie in vielen kommerziellen Listen üblich, auf Zusätze wie var. nov. oder fa verzichtet.

Für eine grössere Anzahl Samen pro Nummer bitte anfragen!

Seed price will be CHF -.80 each portion.

Normally each portion contain 20-25 seed. Some rare sorts or with bad pollination (Sulco. etc.) could be differ in price and seed quantity. See details.

Please note: Many plants listed with their group name (like Ayl. fiebrigii). This not means, that all plants look the same way. Usually they differ in brown-, yellow-, white-, short- or longspined forms. Also the flower can differ in colour and size between the different locations. I don't have, as usual seen into commercial lists, listed appendix like 'var. nov.' or forma.

For bigger quantities of each number please ask!

dw = dauer winterhart / winter resistant
